

## Dimensional Description

**1、Type R:** Foot mounted units of two or three stages helical gears.

**5、Type RM:** Flange mounted helical geared motor with extended bearing housing.

**2、Type RF:** B5 flange mounted units of two or three stages helical gears.

**6、Type R.SZAD.:** Input shaft type. As altered type from above mentioned types, it is connected with input shaft, instead of motor.

**3、Type RX:** Foot mounted units of single stage helical gears.

**7、Type R..R:** Combined types of two different types. Very big ratios are available with these combined units.

**4、Type RXF:** Flange mounted units of single stage helical gears.

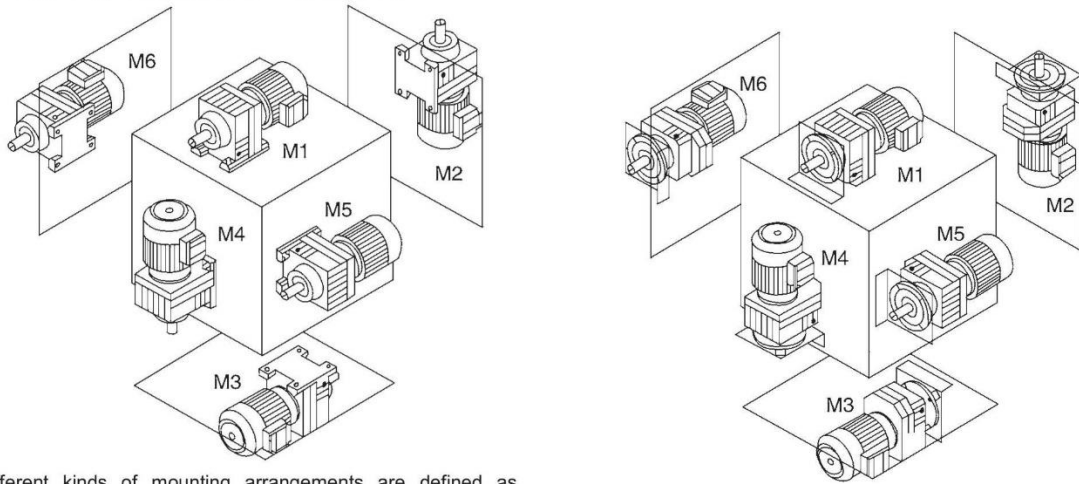

### Type Expression of R Series

- Note: 1、Please make a note, if it needs connecting flange.  
 2、Contents of motors for input shaft types are not listed.  
 3、Degree=0°, if terminal box position is not mentioned. It is x, if cable entry position is not mentioned.  
 3、If specific rotation directions of output shaft or/and input shaft are specially requested, please contact our technology department, and make detailed description while placing order.

### Description of Motor Terminal Box Position and Cable Entry Position

**Mounting Arrangements Description**

Different kinds of mounting arrangements are defined as following:

- M1—horizontally mounted motor, unit foot (for R, RX) or unit base (for RF, RXF) is at bottom.
- M2—motor is vertically mounted downwards.
- M3—horizontally mounted motor, unit foot (for R, RX) or unit base (for RF, RXF) is top.
- M4—motor is vertically mounted upwards.
- M5—horizontally mounted motor, if placed on M1 position, left side of unit turns to bottom (view point: towards from motor side).
- M6—horizontally mounted motor, if placed on M1 position, left side of unit turns to top (view point: towards from motor side).

**(Gear unit weight)**
